Science

For people to have food to eat, farmers grow crops (plants) and raise livestock (animals) on their farm. Farmers need tools and equipment to do their work.

Look at the list of items below.

Decide if each item comes from a crop (plant) or livestock (animal). Some items are tools or pieces of equipment a farmer uses.

Write the item in the correct column.

eggs	bucket	syrup	apples
tractor	cranberries	rake	boxes
hamburger	thermometer	lettuce	soil sensor
strawberries	cow	truck	potatoes
shovel	carrot	oranges	cheese

From a PLANT (crop)	From an ANIMAL (livestock)	TOOL or EQUIPMENT
