

Corn-y Art!

Use corn-based, biodegradable packing peanuts to create farm art!

Materials:

- Corn-based packing foam pieces (like “Magic Nuudles” brand)
- Tray or paper
- Sponge with water (not soaking)

Instructions:

- Decide what kind of agriculture sculpture or image you would like to create! Try a farm animal, barn, equipment, fields, favorite food or flower, etc.
- Tap each piece of foam on the wet sponge (*lightly* – too much water will dissolve the foam!)
- Stick the wet part of the foam onto another piece of foam or onto paper.
- Repeat and create until you have your farm art or sculpture! Create a whole farm scene!

**These foam pieces are made from corn starch, which means they started on a farm!
They are also biodegradable, and they will dissolve easily with water!**
