

# Twisty Apple Tree

Learn about apples as you make a twisty paper bag apple tree!

## Materials:

- 1 piece of sturdy paper, like card stock
- 1 brown paper bag
- Red tissue paper or construction paper
- Green tissue paper or construction paper
- Newspaper
- Black marker or pen
- Glue and scissors

## Instructions:

1. Read about apples [here](https://tinyurl.com/y23lhav4).
2. Write 4 facts you learned about apples around the outside of your paper.
3. With your paper bag flat, cut three slits down the paper bag. Start at the open end of the bag and cut about 1/3 of the way down.
4. Open your bag, stuff it with crumpled newspaper to make a sturdy base and trunk.
5. Twist your bag starting about 1/3 of the way from the base to make your trunk. Then, twist each branch out in different directions so your tree looks real.
6. Cut out green leaves and red apples (or use red tissue paper to make small balls for apples).
7. Glue your apples and leaves to your branches.
8. Glue the base of your bag to the center of your paper and display with pride!
