

## Prepare the Barn for Winter

Read each direction below. Cut out and paste the pictures onto the **Barn Floor Plan** to create a warm winter environment for your animals.

1. There are four stalls for animals in the barn. Put **hay for food and for bedding** in each stall. Some farmers use straw for bedding instead.

2. Choose the **animals** that will live in each stall. You do not need to use them all.

3. Make sure each stall has a **food bowl for grain** and a **heated bucket for water**.

4. Find a place to store extra **bales of hay** and **bags of grain**.
